Thanks- great work on getting the river open. I know that was a crush.

For Sunday, I am sure the agenda is still materializing.

Do you know if EPA or others would want us to be there, present, or otherwise contribute?

I saw that Peter Foster has graphs of the Rotary Park data. Would you include the plume info, or focus on where we are now?

Subject: Whats your schedule today?

Hi Dan,

I know you are short on time, so forgive my brevity, a few direct updates and questions:

I am working on:

1. Invoice through 8/12- is Monday soon enough? yes
2. Budget- long term
3. Sampling proposal long-term

I have questions to run by you:

4. **Weekend schedule-** whats your schedule? what would you like from us? Public meeting on Sunday at ~3?
 - a. Water samples- more to follow on the justification.
5. **Community Feedback-** We are hearing from people that they are concerned about the Ditch washouts, increased yellow in Silverton (are they pond cleaning?)- there is interest
 - a. Sediment changes with lifting the ban on the river- we also thought that people may be

interested in knowing if there are changes in sediment once the river use returns. This may be worth including in your sediment plan (at least temporarily). I don't understand.

6. **ROTARTY PARK DATA-** Since the Rotary park data has been released by EPA, may we present our own graphs of our data on our website etc? of course.

I am going to be away from the office and cell service this weekend, and I am cueing up staff to cover for MSI. Aaron Kimple, cc'd here is available if we need to be present for meetings, etc. 970-749-7916.

I am curious if you will still be here on Monday, and what else you need. I am here I think thru Tuesday for an open house.

Thank you, a lot more to follow-

Marcie
